LTI 1.1 Tool Consumer

This is a sample LTI 1.1 Tool Consumer. To get started, try this:

1. Create a Assignment - Register or log in as a teacher and create an assignment. Assignments are LTI links to content or tools provided by LTI Tool Providers.
2. Launch an Assignment - Register or log in as a student and launch an assignment. Note that many Tool Providers will treat students and teachers differently.
3. Check out the source code to see how the magic happens!

There are other things you can try such as launching an assignment as a teacher, or log out and launch an assignment anonymously. Also be sure to check out the companion sample LTI 1.1 Tool Provider.

Assignments

There are no assignments yet. To create an assignment, log in or register as a teacher and create one!
